## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, HTML5, CSS3, C (Basic)  
**Frontend:** React.js, Tailwind CSS, Bootstrap, EJS  
**Backend:** Node.js, Express.js, MongoDB, PostgreSQL  
**Tools & Technologies:** Git, REST APIs, Linux, AWS, Firebase, Vercel, DSA (Basic)  
**State Management:** Zustand, Context API, Session Storage  
**Computer Science Fundamentals:** OOP Concepts (Basic)

## CERTIFICATIONS

### JavaScript (Basic) Certificate

HackerRank

Certification ID: 75e4d6a7b388

- Demonstrated proficiency in JavaScript fundamentals, data structures, and problem-solving
- Certificate URL: [View Certificate](#)

## EXPERIENCE

### Self-Taught Full Stack Developer

2023 – Present

Independent Learning & Project Development

Kerala, India

- Transitioned from operations/accounting to software development through dedicated self-learning
- Built 9+ full-stack applications demonstrating proficiency in MERN stack and modern web technologies
- Developed expertise in React.js, Node.js, MongoDB, and modern JavaScript frameworks
- Overcame significant health challenges while maintaining consistent learning and development progress
- Demonstrated strong problem-solving skills and adaptability in learning new technologies

## PROJECTS

### Fashion E-commerce (Full Stack) | Node.js, Express, MongoDB, EJS, AWS

2024

- Built a full-stack shopping platform with user authentication, product management, cart, and admin dashboard
- Implemented secure user authentication, product catalog management, and order processing
- Deployed on AWS with scalable architecture supporting multiple concurrent users
- GitHub: [View Code](#)

### Netflix Clone (Full Stack) | React, Node.js, Express, MongoDB, Zustand, Tailwind

2024

- Full-stack streaming service clone with comprehensive movie browsing, search, and user management features
- Implemented advanced search functionality, movie suggestions, actor profiles, and user movie history tracking
- Built detailed movie pages with cast information, recommendations, and integrated TMDB API for real-time data
- Used MongoDB for user data persistence and Zustand for efficient state management
- GitHub: [View Code](#)

### OLX Clone | React, Tailwind CSS, Firebase

2024

- Developed a marketplace clone with product listings, search, and user interactions
- Integrated Firebase for real-time data management and user authentication
- Implemented responsive design with modern UI/UX principles using Tailwind CSS
- GitHub: [View Code](#) | Live: [Demo](#)

### Job List App (Full Stack) | React (Vite), Node.js, Express, Tailwind CSS

2024

- Modern job listing app with React (Vite) frontend and Node.js + Express backend

- Built RESTful APIs for job management and implemented responsive UI with Tailwind CSS
- Used Vite for optimized development workflow and faster build times
- GitHub: [View Code](#)

#### **Advanced Todo App | React, Session Storage, Tailwind**

2024

- Feature-rich task manager with session storage persistence and category organization
- Implemented task categorization, priority levels, and local data persistence
- Built with responsive design and intuitive user experience
- GitHub: [View Code](#) | Live: [Demo](#)

#### **Weather Dashboard | React, OpenWeather API, Geolocation**

2024

- Real-time weather app with dynamic data visualization using React, OpenWeather API, and Geolocation
- Integrated geolocation services for automatic location detection and weather updates
- Built interactive dashboard with weather forecasts and location-based services
- GitHub: [View Code](#)

#### **TypeScript CRUD App | React, TypeScript, Tailwind**

2024

- Clean implementation of CRUD operations with React and TypeScript for type-safe development
- Built reusable components with strong typing and comprehensive error handling
- Demonstrated advanced TypeScript features and modern React patterns
- GitHub: [View Code](#)

#### **Digital Clock with Alarm | HTML, CSS, JavaScript, Web Audio API**

2024

- Feature-rich digital clock with real-time updates, animations, theme toggle, and advanced alarm system
- Implemented Web Audio API for alarm functionality and smooth animations
- Built with responsive design and multiple theme options
- GitHub: [View Code](#) | Live: [Demo](#)

#### **Calculator | HTML, CSS, JavaScript**

2024

- Responsive calculator with clean design and real-time input/output display
- Implemented advanced mathematical operations and error handling
- Built with vanilla JavaScript demonstrating fundamental programming concepts
- GitHub: [View Code](#) | Live: [Demo](#)

### **ADDITIONAL INFORMATION**

---

#### **Career Transition**

2023

- Successfully transitioned from operations/accounting background to software development
- Demonstrated resilience and perseverance by overcoming health challenges while learning
- Self-motivated learner with strong problem-solving abilities and growth mindset
- Passionate about building real-world solutions and contributing to development teams
